Time for a drink

Planter's Punch

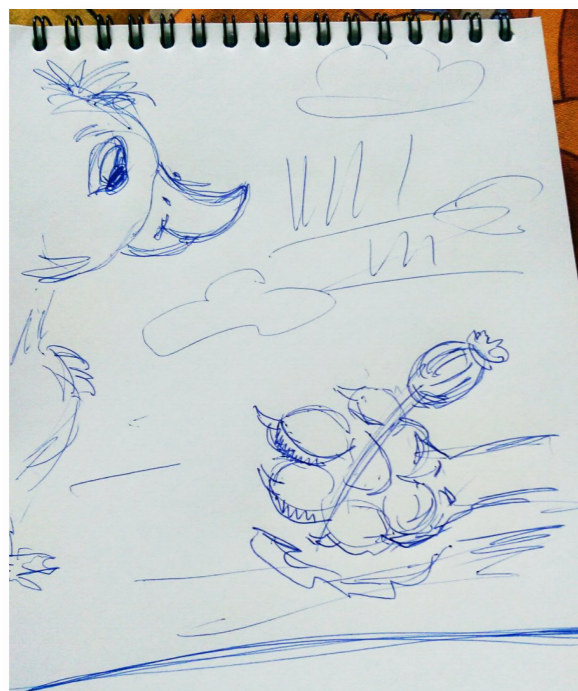

The Planter's Punch flowed out of the rum-rich Caribbean well over a century ago, and its origins date back centuries. Originally a simple combination of a full-flavored rum with lime juice, sugar, some form of spice and plenty of ice, the Planter's Punch morphed over the decades into elaborate concoctions containing pineapple juice, grenadine, several types of rum and so on, and the drink is the common ancestor of all those tiki drinks and punches that are once again in vogue.

While messing with original recipes is often disdained in the cocktail world, the Planter's Punch is the kind of laid-back drink that it's best not to get too worked up about.

Feel free to experiment with the basic recipe substituting grenadine for some of the sugar, for example, or trying a mixture of different styles of rum.

As long as the drink remains icy and refreshing, virtually any edits you make are bound to work out.
